» 360° PAYMENT

WE OFFER THE COMPLETE PACKAGE!

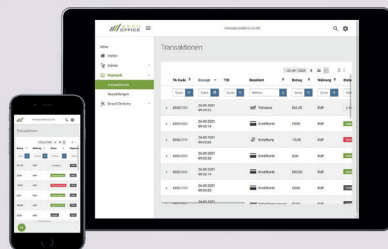

It has never been more important to initiate and conclude transactions on as many channels as possible. **As your all-round payment partner we are at your side.**

- ✓ **POINT-OF-SALE:** card readers, QR payment, acquiring, MoTo (mail- / telephone order)
- ✓ **E-COMMERCE:** online shops, market places, payment link
- ✓ **LOYALTY:** vouchers, loyalty programmes, employee cards
- ✓ **ISSUING:** SocialCard, benefit-in-kind cards
- ✓ **CROWD PAYMENT:** crowdfunding, crowdinvesting, NFT, digital assets
- ✓ **SPECIAL PAYMENT SOLUTIONS:** payouts, interest payments

ALL SALES AT A GLANCE: IN THE ONLINE MERCHANT PORTAL

- ▶ Overview of all transactions with status
- ▶ Your payment advice notes and invoices
- ▶ Data can be exported for further use
- ▶ All functions can be integrated into your own systems

»» CARD READERS WITH ADDED VALUE

With our card readers, you can offer your customers contactless, secure and fast acceptance of all common card payment methods. You can choose whether your terminal is suitable for stationary, mobile or wireless use.

PAYOUTS MATCHING CASH REGISTER CLOSURE

We simplify your accounting: with precise settlements for credit card and accounting payments that align exactly with your cash register closure.

ACCOUNTING SERVICE

Save on bank charges and DTA contract* now: We bundle your Girocard transactions and pay them out to your business account in a single payment.

ADDITIONAL FEATURES FOR YOUR CARD READER

Your card reader can do more than just process payments – with our terminal apps:

- ✓ Accept your own **voucher and employee cards**
- ✓ Collect donations during the payment process via a **donation app**
- ✓ Sell **gift cards from various providers** and benefit from commissions

* Contract for the transmission of account statement information from the Bank to the customer

» ONLINE SHOPS

YOUR ONLINE SHOP SYSTEM IS NOT INCLUDED? NO PROBLEM!

We are happy to provide you with our SDK (Software Development Kit) for easy integration.

» ONLINE MARKETPLACES

Mixed baskets

Combine products from multiple suppliers into a **single** order – we take care of the smooth splitting and payout.

Payments splitting

Automate the splitting and payout process to stakeholders – including the reversal of refunds and cancellations.

Web-based onboarding

Web-based onboarding process, including identification in accordance with the GwG, saves effort and gets new participants up and running quickly.

WE OFFER YOU:

- ✓ ZAG-compliant payment processing via insolvency-proof escrow accounts
- ✓ Fast integration via REST-API or CLIENT-SDK
- ✓ Better conversions through one-click payments

» CROWD PAYMENT

secupay supports crowd payment platforms in all project phases as a reliable partner.

COLLECTING FUNDING AMOUNTS

With secupay's solutions, donors are free to choose their preferred means of payment and can rely on the secure storage and allocation of the deposited amounts. We offer:

- ✓ A project-specific IBAN
- ✓ Payment processing via an insolvency-proof escrow account in accordance with ZAG

If the project goal is not achieved, secupay pays back the funds already paid in to the donors.

PAYOUT FUNDING AMOUNTS

If the disbursement requirements are met, the disbursement starts to the project. Depending on the project specifications

- ✓ A funding threshold is considered, in case this has been defined for a project
- ✓ We pay out in one sum or in phases over several instalments
- ✓ Automatic charging of fees and commissions is possible

INTEREST AND REPAYMENTS

With crowd investing, we ensure that interest and redemption payments, including capital gains tax payments, are credited to investors' accounts on time.

We pay the capital gains tax (KapESt) on interest income including solidarity surcharge and, if applicable, church tax to the tax office as part of our legal obligation.

» SPECIAL PAYMENT SOLUTIONS

Customer and merchant-friendly payment processes that seamlessly integrate into your business operations while remaining clear and intuitive from an accounting perspective: **We are happy to support you with this.**

THE SECUPAY PAYOUT FUNCTION

secupay's payout function is used wherever a large number of payouts need to be initiated simultaneously – both to changing recipients and to a closed circle of recipients.

This is how our customers use the payout function:

- ▶ **For cashback and couponing campaigns:**
small amounts are paid out to campaign participants
- ▶ **A hotel chain:**
for processing and distributing industry discounts to hotel businesses
- ▶ **An agency for personnel management:**
for payroll and salary payments.
- ▶ **An energy supplier:**
reimbursement of charging costs to users of electric company cars / partners

SECUPAY

» SECUPAY: WHEN IT COMES TO PAYMENT.

Are you looking for a reliable partner for **secure** and **customised payment** and individual customer loyalty from a single source?

Then you've come to the right place.

YOU WILL BENEFIT FROM:

- ✓ 25 years of experience in the payment sector
- ✓ Omni-channel payments for POS and eCommerce via an API
- ✓ Customised solutions instead of 'off-the-shelf' payments
- ✓ Personal support with short decision-making processes
